

ULTRA TREMOLO UT100

Thank you for showing your confidence in us by purchasing the BEHRINGER ULTRA TREMOLO UT100. This high-quality effects pedal is designed to provide guitarists easy-to-use tremolo effect styles. Thanks to its high-performance features you get the classic, warm and mind-bending tremolo effects of vintage '60s amps.

The tremolo effect is achieved by periodic modulation of the input signal level. This results in a continuous change from low to high level that has a quivering, tremulous sound character.

1. CONTROLS

Top view

- 1 The **RATE** control adjusts the speed of the tremolo effect.
- 2 The **DEPTH** control adjusts the intensity of the effect.
- 3 The **WAVE** control alters the LFO waveform that modulates the input signal from triangle to square. This way you can achieve practically any tremolo sound, from classic to radical styles.
- 4 The **ON/BATT** LED illuminates when the effect is activated. It also serves as a battery level indicator.
- 5 Use the footswitch to activate/deactivate the effect.
- 6 Use this 1/4" TS **IN** connector to plug in the instrument cable.
- 7 The 1/4" TS **OUT** connector sends the signal to your amp.

Use the **DC IN** connection to plug in a 9 V power supply (not included).

The **BATTERY COMPARTMENT** is located underneath the pedal cover. To install or replace the 9 V battery, press the hinges with a ballpen and remove the pedal cover. Be careful not to scratch the unit.

 The UT100 has no on/off switch. As soon as you insert the jack into the **IN** connector, the UT100 begins running. When not using the UT100, remove the jack from the **IN** connector. This extends the life of the battery.

The *SERIAL NUMBER* is located at the bottom.
